thinking, acting, and innovating in the service of society with

- 480 professors, 240 lecturers, and 1,700 assistants
in an outstanding infrastructure
- 17,500 undergraduates, graduates and doctoral students at around
160 institutes in eight faculties in a broad spectrum of academic
disciplines from German studies to physics and medicine
- 40 bachelor programs, 70 master programs, and over 200 further
degree courses with 4,200 academic qualifications per year
- doctoral programs and graduate schools designed specifically
to encourage young scientists
- approximately CHF 850 million annual budget with a very
high proportion of competitive external funding: indicative of the
high value of Bernese research

Researching and Teaching at the Highest Level

University of Bern – knowledge creates value

Internationally connected and regionally anchored, the University of Bern cultivates exchange with society and strengthens partnerships between science, business, and politics. The University of Bern is committed to a deliberate and ethical responsibility towards people and animals and innumerate nature. It seeks to be an important educator in the future, to promote enterprise and industry in the region and beyond, and to disengage itself through problem-oriented research into questions of pressing social relevance.
