**Student Internship in IT Group Communications with focus on UX, Innovation and Design Thinking (80 – 100%, 6 – 12 months, starting in December)**

Switzerland, Argovia, Kaiseraugst

At Roche, we believe it’s urgent to deliver medical solutions right now – even as we develop innovations for the future. We are passionate about transforming patients’ lives and we are fearless in both making decisions and taking action. And we believe that good business means a better world. Group Functions Informatics is a multicultural, dynamic team providing IT solutions for Group Communications, Human Resources, Legal, and Cross Functional services for Roche globally. The IT for Group Communications team is responsible for the implementation and life-cycle of digital solutions in the area of Intranet, Internet, Digital Asset Management, Social Media, etc. based on state-of-the-art methodologies and technologies, which enable the Digital Strategy for internal and external communications.

**Your responsibilities during the internship**

- Support the execution of agile and Design Thinking workshops by collecting, analysing and synthesising data
- Document the content and outcome of the workshops and follow up on agreed actions
- Coordinate and initiate innovation projects by identifying the best technologies to realise experiments (e.g. UX Design, Artificial Intelligence or Machine Learning)
- Assist IT and Creative Solutions teams as well as project managers and IT business analysts
- Collaborate with the Innovation Lab and Innovation Network teams

**Who you are**

You are someone who wants to influence your own development. You are looking for a company where you have the opportunity to pursue your interests across functions and geographies. Working in a multicultural environment motivates you. As a fast learner you actively drive the quality of the requirements.

Moreover, you are

- An ambitious student who is currently enrolled in Computer Science (preferably with a focus on Design and/or Communications, UX/UI Design, Computational Linguistics, Data Science, Digital Design or a related field) or in a gap year between degrees
- Enthusiastic about new technologies, digital design and -strategies
- A person who works systematically and precisely and brings a high level of initiative as well as a dedicated attitude
- Willing to contribute to the research, analysis, implementation and application of digital solution and social media into communication solutions
- Able to work independently with little guidance, have a proactive and open-minded attitude
- Proficient in English (German is a plus)

**To be considered, please send us your complete application merged into one PDF including**

- CV
- Motivation Letter (including desired starting date & duration)
- A certificate of enrollment (if you are currently studying)
- For **non-EU/EFTA citizens:** Certificate from the university stating that an internship is mandatory (required due to regulations)

Are you ready to apply? We are looking for someone who thinks beyond the job offered – someone who knows that this position can be a rare springboard to many other opportunities at Roche. When applying for this position, already project yourself in the future. Think about what could come next and how you would like to build your future.

Roche embraces diversity and equal opportunity in a serious way. We are dedicated to building a team that represents a range of backgrounds, perspectives, and skills. The more inclusive we are, the better our work will be.

**Who we are**

Roche Kaiseraugst is a cornerstone of Roche’s global production and logistics network. It employs some 1900 people and is Roche’s largest and most innovative packaging facility worldwide.
