

## Minimum standards for confirmations of completion of degree

Degree certificates are issued frequently only several weeks after effective completion of the degree course. So you can still begin your master degree, we will accept an interim confirmation if it meets the minimum standards. **The degree certificate must be presented when it has been received.**

### Minimum standards

1. The successful degree must be confirmed clearly and unambiguously. The degree may no longer be subject to conditions (credits, examinations, work, etc.). Otherwise, the confirmation is not recognised.
2. The confirmation must be issued by the relevant faculty (letterhead, stamp and signature of the dean). Confirmations from academic institutions or other subunits are not accepted. A diploma confirmation issued directly by the University, however, is conceivable.
3. The degree confirmation must bear the title, the combination of subjects including ECTS, the final grade, and the completion date
