

## Scientific Integrity

### Content

Basic rules of good scientific practice such as sincerity and honesty, openness, self-criticism, self-discipline, ethical reflection and fairness are of prime importance in all research activities and are prerequisites for the credibility and acceptance of science.

The aim of the lecture "Scientific Integrity" is to give an introduction to the central rules of good scientific practice to PhD students of all fields and to raise their awareness for common international standards for scientific integrity that concern their own work.

### Topics will include:

- Principles of scientific integrity
- Planning of research projects
- Realisation of research projects
- Misconduct in the scientific context
- Procedures at the University of Bern
- Impact of scientific misconduct on society and consequences for the research community

Learning Objectives	Participants are aware of the topic 'scientific integrity'.
Individual Feedback	The course provides time for discussions.
Speaker	<u>Prof. Dr. Torsten Ochsenreiter</u> , University of Bern
Target Group	PhD students of all fields as well as postdoctoral researchers
Language	english
Nr of Participants	30
