OF BERN**

ENLIGHT

At a glance

10 comprehensive
research-intensive
universities

Creation of an
interconnected campus

Innovative international
teaching collaborations
and new mobility formats

ENLIGHT

University Alliance

ENLIGHT contributes to the strategic goals of the University of Bern in the areas of internationalization, the promotion of outstanding teaching, digitalization and societal relevance.

European Universities Initiative

European University Alliances are an important part of the European strategy for universities and Erasmus+.

University Alliance ENLIGHT

ENLIGHT tackles today's major challenges in areas such as healthcare, climate change and digitalization through transdisciplinary and transnational teaching, research, and innovation. The alliance is building a better future for generations to come by addressing current societal issues in a positive and transformative way.

Six focus areas of ENLIGHT

Health and Well-being

Digitalization

Climate Change

Energy and Circular Economy

Equity

Culture and Creativity

Vision of ENLIGHT

Students can take courses from all member universities as part of a common ENLIGHT campus. Student mobility becomes more diverse, with semester mobility enriched by new formats.

Lecturers receive support in developing new and innovative learning formats in cooperation with other ENLIGHT partner universities.

Researchers and doctoral students benefit from a network of reliable partners consisting of ten comprehensive, research-intensive universities.

Employees benefit from professional development opportunities and joint staff development offers.

ENLIGHT

For Lecturers

ENLIGHT integrates internationalization experiences into the curricula and provides intercultural skills to students in all study programs.

How can lecturers benefit?

Lecturers from all ENLIGHT universities benefit from the exchange on innovative learning formats and funding opportunities for collaborative teaching. They can also raise the profile of their own teaching and develop it further.

Teaching Collaborations

Various learning formats can be developed within ENLIGHT, such as:

- Recurring individual courses
- Shared or jointly developed modules
- Mobility windows
- Joint or Double Degree programs

Teaching collaborations can vary in intensity and are scalable.

Teaching-related funding opportunities

Academic regulations

Courses in cooperation with partner universities can be offered in English and online. They can be credited towards the teaching load.

How to proceed?

If you are interested in developing new learning formats, please

1. Contact your colleagues at the ENLIGHT partner universities to develop your idea.
2. Embed the learning offer in your study program.
3. Contact the UniBE ENLIGHT Core Team enlight@unibe.ch

Mobility Agreements

If you wish to increase student mobility in your study program, please reach out to the departmental coordinator in your institute to discuss the possibility of a SEMP exchange agreement. UniBE International will support you with drafting the agreement.

Get in touch

Contact us at enlight@unibe.ch with a brief project description in English.
