

Support for information and computer technology in teaching and research

iLUB

Overview of Services and Tools

At the University of Bern, technological support for innovative teaching and research as well as collaboration methods is provided by iLUB.

www.ilub.unibe.ch

ILIAS – Central e-learning platform

ILIAS provides fast access to reading assignments and other course materials used

in conventional instruction. It can also be employed as a platform for distance learning programs conducted entirely online and collaborate with others. ILIAS courses can be generated in course announcement of Core Teaching System (CTS). In the further development of ILIAS, the needs of the University of Bern are taken into account.

iTools – Online surveys and working groups

ILIAS employees and students can set up individual ILIAS applications in the

iTools area that are independent of courses and use them for their own purposes such as group work or surveys.

VHO – User accounts for external persons

Guest speaker and researchers outside Swiss universities

get access to ILIAS with a VHO account.

Video in Teaching – Podcasts, teaching and learning videos and webinars

Several of the lecture halls at the University of Bern are equipped with podcast infrastructure. We support the use of video in teaching, of course records and creating teaching/learning videos and webinars (web meetings with video).

Video production – Creation & Consulting

Teaching and research can benefit enormously from targeted use of video. We create professional products for you (for a fee) or provide you with our know-how and advice (free of charge).

Workshops – Introduce the topic of computer-supported learning.

Employees of the University of Bern learn step by step about ICT-supported teaching, e-learning, video and collaboration in higher education and research. In hands-on courses, all participants work on the following contents under expert guidance.

Interactive collaboration

Collaboration in virtual space from distributed locations can be realized with different tools. With webinars, online meetings, wikis and brainstorming in real time, it is possible to work on a common task independent of time and space. We help with expert knowledge to select the appropriate scenario, advise and support with digital solutions.

iliasEXAM - The central examination platform

The examination platform iliasEXAM offers the possibility to digitally set up and conduct exams and to have them partially or completely scored and graded. In addition to traditional, text-based exam questions, iliasEXAM allows for the integration of media such as video and audio into the exam.
