PhD Position in Visceral Surgery_Radiation-Induced Liver Disease

A PhD student position in the field of hepatocellular biology is available. The project is aimed to investigate the hepatocellular injury in response to radiotherapy and targeting novel pathways for radioprotection. The candidate will work with state-of-the art techniques in molecular & cell biology, cell culture, protein and molecular biology techniques and the use of in vivo models.

Requirements

Applicants must hold a European academic degree in natural sciences (MSc or equivalent) acceptable for matriculation as a Ph.D. student at a Swiss University. Students will have to be admitted to the Graduate School for Cellular and Biomedical Sciences, University of Bern.
