Quick Reminder: How does it work?

- Big Deal license that has evolved to include subscriptions and funding for Open Access.
- READ: institution has access to a publisher's subscription content. Pricing often based on current subscriptions.
- PUBLISH: APCs for the institution's faculty are waived and built into the contract price.

Read & Publish

Current Situation

- swissuniversities will expand negotiations to smaller publishers
- R&P-Deals are part of the national strategy to transform publishing to 100% open access until 2024

Open Access Rights and licences **Financial support** Evaluation and OA initiatives Support

Many scientific publishers charge publication fees for Open Access Gold, which is known as article processing charges (APCs) or book processing charges (BPCs). These charges vary greatly in amount, with Hybrid OA generally costing significantly more than Gold OA. Reputable Open Access journals are transparent about their APCs and communicate them clearly on their websites. For further information on evaluating journals, see [this checklist](#).
